

CROSSFLOW PLATE HEAT EXCHANGER STOCK CUBES

- › Recuperator Stock Cubes are made up by combining more basic units (check data list) for each model.
- › Special rubber gaskets or sealing are necessary to ensure tightness between the side plates

CHARACTERISTICS

- › Cheaper price
- › Available models 04 - 05 - 06
- › Length from 7.874 inch to 70.87 inch
- › Max differential pressure 6.022 inWC
- › Aluminum plates "AL"
- › Reduced side plates "AZ" and aluminum "slide-in" corner profile "CD", for a quick installation
- › Additionally sealed exchanger block "SC" no silicon sealant "NS"

DIMENSIONS AND PERFORMANCE

Summary table for quick reference.

Typical performance: for more accurate selection, please use our Rex selection program or contact Recuperator.

Model	Flow Rate (cfm)	B1 in	A1 in	ΔP inWC	η %
STKx 04	589 to 4,414	15.75x15.75	7.874 to 59.06	<1.004	> 50
STKx 05	1,118 to 5,533	19.69x19.69	11.81 to 59.06		
STKx 06	1,883 to 8,593	23.62x23.62	15.75 to 70.87		

Performance based on maximum length.
